

New
**MG HS &
HS PHEV**

A new standard

More space, more silence, more power: the new HS offers the best you can expect from an SUV.

With a renewed design and a new platform, the new MG HS is sportier than ever. The extended wheelbase and generous dimensions allow the whole family to be always accommodated in a high level of comfort. Whether it's your daily commute or an adventurous weekend away, the new MG HS will be with you every step of the way.

Available with a petrol engine and a plug-in hybrid (PHEV) version offering 100 km of EV range, there's always an MG HS to meet your needs.

Sportier design

Carrying MG's new design language, the new MG HS displays a resolutely dynamic personality thanks to a wide grille topped by sharp, technological LED headlamps.

The horizontal design of the side give strength to the vehicle, while the floating pillar accentuates the dynamic roofline. With its standard 19" wheels, the new MG HS will impress in any situation.

Quality and practicality

The new MG HS has been designed to offer exceptional interior space for all passengers. The horizontal, symmetrical layout of the dashboard creates a real sense of space.

The use of soft materials and precise assembly bring a high level of perceived quality. All details, such as the gear-lever and 3-spoke steering wheel, are carefully crafted using high-quality materials.

In the new MG HS, the digital experience is immersive and qualitative. Proof of the high level of technology, the double floating screen clearly transmits driving and entertainment information to the driver and front passenger.

Space for the whole family

Space on board has been at the heart of the development of the new MG HS. First for occupants, who benefit from generous legroom and headroom in both front and rear. The ISOFIX attachment points available at the rear make sure you can easily and safely install your young children.

Then there is luggage space, with 507L (441L on PHEV) capacity ready to meet all your needs and equipped with a cargo net. Small items are not forgotten either, with 19 storage compartments throughout the cabin including 8 for rear passengers.

First class comfort

Thanks to its carefully tuned suspension, the new MG HS offers a smooth ride in all situations. To ensure that your long journeys are comfortable for every passenger, the seats have been given special care with a 5-layer design.

Because soundproofing is essential to reduce fatigue, the new MG HS is remarkably quiet on board. Right from the design stage, the vehicle's high rigidity and aerodynamic shape reduce the level of road noise. And thanks to 42 sound-absorbing materials scattered around the vehicle, you're also isolated from outside noise.

HS PHEV, always further ahead

Inaugurating a new generation of plug-in hybrid (PHEV) powertrain benefiting from MG's experience in electric vehicles, the new MG HS PHEV can reach 100 km (WLTP) on a single charge.

With a 21.4 kWh battery and a powerful 184 hp electric motor, the new MG HS PHEV offers a true electric experience for your daily commute... and more. Enjoy the silence, smooth ride and low CO₂ emissions (14 g/km). Thanks to an optimized petrol engine, fuel consumption remains low even when you need to go further, enabling a combined range of over 1,000 km.

And the best part? You don't have to choose between low fuel consumption and outstanding performance. With a combined power output of 272 hp and dynamic acceleration, you can enjoy yourself too.

Some of the equipment mentioned and presented in this document is only standard on certain trim levels

A new generation of Plug-In Hybrid (PHEV) powertrain

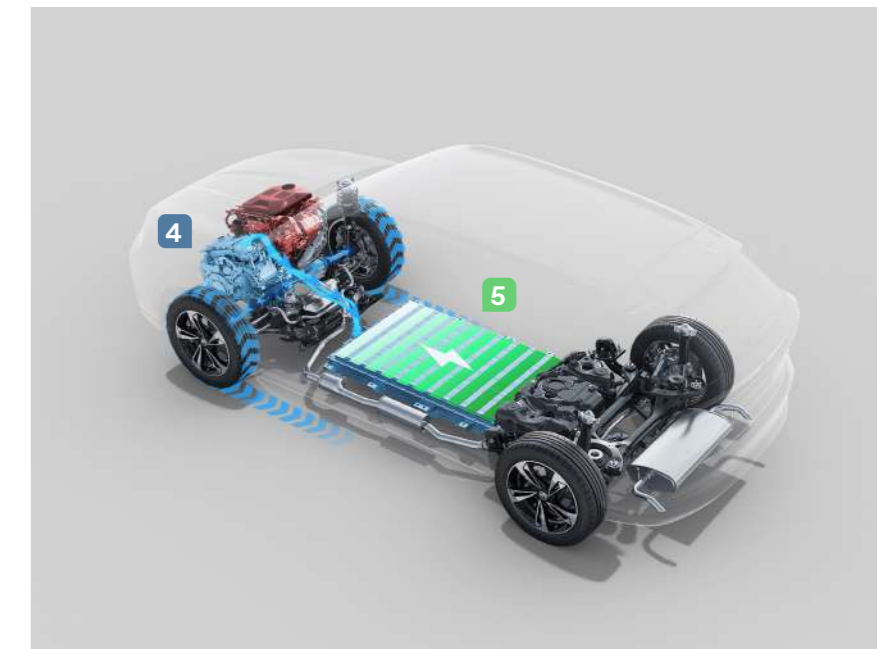

The new MG HS Plug-In Hybrid inaugurates a new generation of PHEV powertrain that benefit from MG's experience in electric vehicles. It relies on 5 different components:

- 1 A 1.5-liter turbo engine dedicated to hybrid, with a record thermal efficiency of 43% and a power output of 143 hp,
- 2 A powerful EV motor (135 kW, 184 hp) for strong acceleration in EV and hybrid modes,
- 3 A strong generator (110 kW, 150 hp) to supply high power to the EV motor,
- 4 A lightweight two-speed gearbox to keep the engine running at peak performance,
- 5 One of the biggest battery in the segment (21.4 kWh) for a range of 100 km in electric mode.

Thanks to these components, the new MG HS offers several different driving modes to always make the most of the electric motor and internal combustion engine.

Full EV mode: after having fully charged the battery in only 3 hours with a Wallbox thanks to its 7kW AC charging capacity, enjoy the full EV mode with its silence and smooth ride for 100 km*.

Hybrid Mode : When required, the new MG HS PHEV can work both in hybrid parallel and hybrid series mode to offer alternatively strong performance or low fuel consumption. But don't worry, everything is transparent for you, based on speed, acceleration requirements and battery charge, these different driving scenarios are automatically selected.

The latest technology, standard

At MG, we're committed to making the latest technologies accessible.

The new MG HS is no exception, offering a wide range of driving assistance and comfort features as standard. These include dual 12.3" screen, rearview camera and hands-free access.

Want more? The Luxury trim adds the latest technologies, including a 360° camera, heated front seats, an induction charger for smartphones and an electric tailgate.

An immersive digital experience

The digital experience has been carefully designed to be unique. The two 12.3-inch screens give the interior a distinctive technological look. The digital cluster summarizes key information directly in front of the driver. With Apple Carplay™ and Android Auto™ as standard, stay connected with your favourite applications. 4 USB ports keep all 4 passengers charged at all times.

Safety as a priority

We designed the MG HS with safety as a top priority and to offer best-in-class passive and active safety.

With 13 MG Pilot ADAS systems available as standard, including automatic emergency braking, blind spot detection and rear cross braking, the new MG HS reduces the risk of an accident, whether from the front or rear.

Passive safety has not been forgotten with 7 airbags. These include a central front airbag that protects both driver and passenger. The overall structure features over 70% high-strength steel for maximum protection.
