

MG EHS Plug-in Hybrid

It's for you

Whoever
you are
Wherever
you're going

If you're considering going electric but still want to go the distance, then the MG EHS Plug-in Hybrid is perfect for you. Its powerful engine and economical electric motor mean you're reducing CO₂ emissions without sacrificing range. Its sleek, sporty looks and spacious interior mean that you're not sacrificing comfort for style.

City driver? It's for you.

Road trip? It's for you.

City driver on a road trip? It's for you.

Solo? Couple? Family? It's for you.

And you. And you!

And... you.

Plug-in Hybrid

Plug-in Hybrid: low emissions, high range, convenient charging.

Innovative technology: keyless entry, Apple CarPlay™, Android Auto™ and more.

Complete peace of mind: 7 year warranty.

Made for you

The MG EHS Plug-in Hybrid was made for you – top to bottom, inside and out.

It's time to embrace next-generation mobility, with no restrictions. Reduce your CO₂ emissions in a dynamic SUV that offers all the high-quality specs and long range that make driving a true pleasure.

With its purposeful, sporty looks and a spacious interior filled with comfort and intelligent features, it's easy to just get in and get away for the perfect escape. Relax in the generous seats and enjoy the welcoming interior as our MG Pilot driver-assistance tech smooths out the ride.

There are two attractive levels of trim to discover – Comfort and Luxury – so there's always an MG EHS Plug-in Hybrid that suits your lifestyle.

Recharge yourself

The use of superior materials and leather options adds refinement and luxury throughout the interior.

A bold 10.1" colour infotainment touchscreen at the heart of the stylish dashboard offers satellite navigation and mobile connectivity.

The spacious interior has class-leading room in the front and convenient reclining seats in the rear.

An advanced integrated 6-speaker sound system with DAB audio lets you pick the perfect soundtrack for every trip.

Thanks to the integrated USB mobile phone charging function, you'll never lose touch with your friends and family.

The 360° parking camera gives you an unobstructed view in even the tightest parking spots.

Adaptable ambient lighting lets you customise the mood of your interior – soft or sporty, it's all up to you.

Ergonomically designed seats provide comfort and support in all the right places, for an extra smooth ride.

The best of both worlds

The new MG EHS Plug-in Hybrid is the perfect union of efficiency and performance.

Delivering up to 52km* on the electric motor alone, it drives your CO₂ emissions down to just 43g/km*, reducing your carbon footprint and your fuel bills. There's ample power too, with a combined output of 258PS that takes you to 100km/h in just 6.9 seconds.

To make every drive truly effortless, we've also introduced an innovative 10-speed transmission. Designed to optimise power delivery and efficiency, it delivers optimum performance in both hybrid and electric-only mode.

* The combined test result under WLTP test protocol.

MG Pilot →

Keeping you safe
on the road

The MG Pilot suite of high-tech driver assistance technology gives you added confidence on the road.

A range of warning and alert features in the MG EHS Plug-in Hybrid assist the driver, helping to maintain safety and simplify everyday driving.

Active Emergency Braking (AEB)

At speeds below 20 km/h, the MG EHS Plug-in Hybrid will automatically apply its brakes to avoid a collision with a vehicle, bicycle or pedestrian. At speeds above 20 km/h, AEB will reduce the likelihood or mitigate the severity of an accident.

Lane Keep Assist (LKA)

Lane Keep Assist uses a camera to detect lane markings ahead and monitors the vehicle's position in its lane. When LKA detects the vehicle is about to unintentionally move out of its lane, it warns the driver by means of a visual and audible cues and steering wheel vibration. The MG EHS Plug-in Hybrid will also adjust the steering to keep within its lane.

Adaptive Cruise Control (ACC)

Adaptive Cruise Control monitors the road ahead. As long as the road ahead is clear, ACC maintains the speed set by the driver. If the system spots a slower vehicle within its detection range, it gently reduces speed by releasing the accelerator or actively engaging the brake control system. If the vehicle ahead speeds up or changes lanes, ACC automatically accelerates back to the driver's desired speed.

Traffic Jam Assist (TJA)

When Adaptive Cruise Control is turned on, the MG EHS Plug-in Hybrid continuously analyses the speed of the surrounding vehicles and compares it with its own driving speed. If the system detects dense traffic or a traffic jam at speeds below 60km/h, the driver can activate TJA. The car will then automatically follow the vehicle in front, controlling its acceleration, braking and steering within the same lane.

Intelligent High Beam Assist

When the headlight high beam is set to the AUTO position, the system automatically switches to low beam when it detects a vehicle ahead. This enables drivers to maximise the use of high beam, making night-time driving safer, without the risk of dazzling oncoming traffic.

Intelligent Speed Limit Assist

The MG EHS Plug-in Hybrid will actively detect speed limit signs and alert the driver of the current speed limit by displaying a symbol on the driver's instrument cluster. The symbol acts as a reminder to the driver, reducing the risk of exceeding the speed limit.
